

PRODUCT MANUAL

KAIBAB[®] HD

BINOCULAR

SPECIFICATIONS

MAGNIFICATION X OBJECTIVE LENS DIAMETER	18x56
LINEAR FIELD OF VIEW (@1000 YARDS)	194'
ANGULAR FIELD OF VIEW	3.7°
CLOSE FOCUS	19.8'
EYE RELIEF	16.4mm
INTERPUPILLARY DISTANCE	60mm - 76mm
DIOPTER RANGE	±3
HEIGHT	7.7"
WIDTH	5.7"
WEIGHT	43.5 oz.

KAIBAB® HD BINOCULARS

Long-range glassing requires patience, but the right optics make it easier. Kaibab® HD puts every ridge and valley within your reach, giving you the power to spot distant game without taking a single step. Designed for hunters who are serious about every stalk, it combines the comfort of binoculars with the high magnification of spotting scopes. Paired with a tripod, Kaibab® HD helps you make the right call when that moment of truth comes into view.

Images are for representation only.
Product may vary slightly from what is shown.

BASIC OPERATION

Adjust the Eyecups

The Eyecups on Kaibab® HD twist up and down allowing anyone to obtain a full field of view and comfortable viewing despite differences in facial structure and for use with or without glasses.

When not using glasses, generally the Eyecups will be fully extended. When using glasses, generally the Eyecups will be fully collapsed.

Adjust the Interpupillary Distance

The interpupillary distance (IPD) is the distance between the centers of the left and the right eye pupils. Match the IPD of your eyes to the binocular so that you see a single image free of edge distortion.

Distances between the centers of the Ocular Lenses.

Rotate the binocular barrels inward or outward to line your eyes up with the Ocular Lenses.

Focus the Binocular

For the best results, follow this two-step process to properly adjust the Center Focus and Diopter. Choose an object about 20 yards away from you and stay in the same spot until you have adjusted the binocular for your eyes.

- 1. Adjust the Center Focus.** Start by closing your right eye or covering the right Objective Lens with your hand. Look through the left barrel and adjust the Center Focus wheel until the image is in focus. Leave the Center Focus in position as you adjust the Diopter. .

- 2. Adjust the Diopter.** Start by closing your left eye or covering the left Objective Lens with your hand. Look through the right barrel and adjust the Diopter until the image is in focus. Make note of the position of the Diopter setting in case you need to set it again. From this point on, you will only need to use the Center Focus wheel.

ACCESSORIES

Carry Case

The Deluxe Carry Case of the Kaibab® HD provides safe storage between viewing sessions. The carry strap is already attached to the case.

Lens Covers

The Kaibab® HD comes with Tethered Objective Lens Covers and a Rainguard for the Ocular Lenses. Use these covers to protect the lenses whenever you are not using your binocular.

Neck Strap

Attach the Comfort Neck Strap in these three simple steps:

1. Push a few inches of the Strap Attachment on the binocular.
2. Hold the buckle and thread the end of the strap through the buckle.
3. Adjust the overall length, then pull tight until the strap is secured within the buckle.

Note: If using another type of strap, never attach metal o-rings directly onto the Strap Attachment.

MAINTENANCE

Cleaning

Your binocular requires very little routine maintenance other than periodically cleaning the exterior lenses. The binocular exterior may be cleaned by wiping with a soft cloth. When cleaning the lenses, be sure to use products that are specifically designed for use on coated optical lenses.

- Be sure to blow away any dust or grit on the lenses prior to wiping the surfaces.
- Using your breath, or a very small amount of water or pure alcohol, can help remove stubborn dried water spots.

Lubrication

All binocular components are permanently lubricated, so no additional lubricant should be applied.

Note: Other than to remove the Rainguards, Objective Lens Covers, and Tripod Adapter Socket Cap, do not attempt to disassemble any binocular components. Disassembling of binocular may void warranty.

Storage

If possible, avoid storing your binoculars in direct sunlight or any very hot location for long periods of time.

Caution: Binoculars are not intended for looking at the sun, or any other intense light source. Such viewing could damage the retina and cornea of your eyes – even to the point of causing blindness.
